✓ IntelliJ Mermaid 플러그인

The screenshot shows the IntelliJ Mermaid plugin marketplace interface. On the left, a list of plugins is displayed with search results for 'mermaid'. The 'Mermaid' plugin by JetBrains s.r.o. is highlighted. On the right, the details for the 'Mermaid' plugin are shown, including its version (0.0.27+IJ.253) and a link to the plugin homepage. Below the plugin details, a preview window shows an example of a class diagram generated from a Mermaid script. The script defines an 'Animal' class with subclasses 'Duck', 'Fish', and 'Zebra', each with specific attributes and methods. The diagram visualizes these relationships, showing 'Animal' as the base class and the others as subclasses.
